

# WiMER5 WIRELESS MEASUREMENT READ

Bluetooth Low Energy technology

Multi-gage capability

Optional trigger switch

Rechargeable

Multi-platform software capability

Continuous recording and plotting

Data Saving

Precise measurement. Entirely wireless.

Scan to find out more

Wireless Measurement Read (WiMER) 5 is a Bluetooth transmitter for optical and magnetic encoders with 90° phase shift, differential square wave, RS422 (TTL) output.

Simply connect your gage to WiMER, and you can view and record readings in real time (from multiple gages at once) on your smart device or Windows PC.

MultiGage is free to download for iOS, Android, and Windows.
